Hello Jennifer:

Our EPA Region 9 Senior Toxicologist, Dr. Patrick Wilson, will be providing assistance on risk evaluation issues including health risk guidelines for PCBs appropriate for the Santa Monica-Malibu school district situation.

You can reach Dr. Wilson at 415.972.3354.

Thank you for your courtesies.

Sincerely,
Carmen

Dear Carmen:

I have a task force meeting tomorrow at 10 am. If possible, I would love to have a conversation with the EPA staff that will be assigned to us before that meeting.

Thank you for your assistance.

Dear Jennifer:

During the week of November 11, 2013, I will send you the contact information for the EPA staff that will be assigned to work on the PCB matters associated with the Santa Monica-Malibu School District. EPA Region 9 looks forward to assisting the School District as well as the Malibu Schools Environmental Task Force.

As I mentioned during our conversation, we would appreciate receiving contact information for Task Force members.

Thank you for your courtesies and I look forward to your reply.

Sincerely,

Dear Jennifer:

On behalf of U.S. EPA Region 9, I appreciate our dialogue today concerning PCB matters at the Santa Monica-Malibu School District. I have received your message and the document attached to it.

Thank you for your courtesies. We will follow up with you very soon.

Sincerely,
Carmen

Subject: Malibu High School

Dear Carmen:

It was a pleasure to speak to you today. I am sending you all the documents you need. Please let me know if you need more.

<http://www.smmusd.org/PublicNotices/Malibu.html>

Here you can find all the documents. Look under Environmental Documents for the EIR and Removal Action Completion Report on the soil.

There is also a list of the task force members here.

Over the past weekend: 9 low volume air tests were done with lights on, doors closed and ventilation system on (if there was one). This ran for 24-30 hours in order to collect approx 10 cubic meters. The wipe samples and bulk (caulk and paint) were also done. Some rooms had caulk and some had a rubbery material. Radon gas testing was also completed.

Attached is the Initial Sampling Plan, 2nd Draft.
